2011

## Restoring Hope in Uganda and Building Dreams in Laos

The Chi-Ki Children's Charity is enriching the lives of children by championing your spirit this year. Our goal is to build a Girl's Home in Kampala Uganda and a computer center for an Orphanage in Laos.

Since our early beginnings in 2003, we have maintained our Chi-Kiness by working from the inside out. In our grassroots approach, we directly impact poor villages through education; strengthening and enriching the culture. We thrive on encouraging our communities to support families and children through education, tuition, uniforms and books.

Chi-Ki Children's Charity is a unifying force around the world, overflowing with energy, love and devotion towards many life changing projects such as building educational infrastructure like a library, kindergarten, computer center and hospital. We grant college scholarships annually and training for students who dream of having a career and becoming professionals in their field. They have opportunities to work directly with us after graduation; emulating a cyclical system.

In 2011, our objective is to have built a computer center for the largest orphanage in Luang Prabang, Laos. Promoting technical training and computer advancement for children who want to gain access

to the global village and an opportunity to study and work in their chosen field.

In Kampala, Uganda; our goal is to build a necessary shelter for young girls off the street, between the ages of 9 and 18, who are looking for a home. We will provide them with food, housing, education, clothing, and counseling on issues of female health and hygiene. Chi-Ki Children's Charity will work together with ACIN (African Child in Need) to make this a reality. Through our ongoing partnership, we also help boys off the street and support them at the Kampala boys shelter and school.

### How YOU have helped the children of Chi-Ki Children's Charity!

We are grateful to YOU for standing by us for seven years now. You have helped fund a library, kindergarten, a hospital, a computer center in Laos and many scholarships. You have helped create a school in Goa India, and a Boys school and shelter in Uganda. Your continued generosity and support, will keep elevating children towards their dreams and educational goals as we witness smiles on their faces everyday. Thank you.
